Polysine SuperFrost

Menzel

Histology

Polysine slides offer state-of-the art adhesion incorporating revolutionary technology that electrostatically and chemically attract a range of tissues and sections from plant, animal and human sources. Polysine slides are also specially modified to attract and adhere both exfoliated and cultured cells.

Code	Description	Unit	Price/Unit	Price/20Pks
SF41296PL	Polysine Microslide	Pk/72	\$23.30	\$20.60

Polysine SuperFrost

Superfrost Plus Slides

Menzel

Histology

Benefit Summary

- Places a permanent positive charge on standard microscope slides.
- Electrostatically attracts frozen tissue sections and cytology preparations binding them to the slides.
- Forms a bridge so that covalent bonds develop between formalin fixed sections and the glass.
- Eliminates background staining.

Code	Description	Unit	Price/Unit	Price/20Pks
SF41296SP	Superfrost Plus Microslide	Pk/72	\$27.20	\$24.10

Mounting Media

Eukitt is a neutral and colourless mounting media. Its refractive index is the same as that of the glass slides and coverslips to which it is applied. Eukitt will not effect the form, structure or colour of your specimen. It is resistant to heat, cold (down to -17°C), humidity and light. The specimen is therefore conserved indefinitely in an unchanged condition. Eukitt is also ideal for sealing of specimens jars containing anatomical samples.

Code	Description	Unit	Price/Unit
